

# VIETNAM TEAM

In response to COVID-19, the team in Vietnam in collaboration with local partners and community members conducted a rapid assessment of the impacts of the pandemic on children.

Son La province,  
Vietnam

This assessment allowed HealthBridge to make recommendations to political stakeholders on how to best protect children's rights in emergencies and provide actionable measures for mitigating the long-term impacts of COVID-19.

## Strengthening Health Systems and Improving Nutrition in Vietnam

### Project Purpose

To reduce maternal and child mortality in the targeted region of **Son La province, Vietnam**.
