

“
It has been a privilege to partner with Ghana to advance paediatric care in their country. We have learned as much from our partners as they have from us, and we truly thank them for this partnership over many years.
”

- SickKids Centre for Global Child Health team

“
Ghana has made progress in decreasing under-five mortality, but the rate is still too high given the causes of death are mainly preventable. Paediatric nurses are essential to saving lives, and PNEP was the right step towards reducing newborn and child mortality in this country.
”

- Ghana Health System Administrator

SickKids-Ghana Paediatric Nursing Education Partnership (PNEP)

Project Purpose

To build capacity for a high-quality, sustainable, national paediatric nursing education program in **Ghana**.

Designed to Achieve

To train knowledgeable, confident and clinically competent paediatric nurses to help reduce the mortality rate of newborns and children and improve their health and wellbeing.

99%
of PNEP graduates remain in Ghana's healthcare system.

>50%
of nurses recruited from underserved regions.

3
Education sites established.

501
Paediatric nurses trained from more than 200 health facilities across all 16 regions of Ghana.
